Dear Maureen F. Gorson,

The Green Chemistry initiative provides an opportunity to protect California by acting to restrict or eliminate especially dangerous substances and by mandating safer alternatives.

I urge you to ensure that in addition to incentive programs, the initiative implements protective regulations, including restrictions and bans of chemicals for which the weight of evidence demonstrates a severe hazard to human health and/or the environment.

A reply regarding your position on this request would be appreciated.

Sincerely,
Christina Dilleuth
